ReFX Nexus 2 VST v2.2 and Expansions.

NEXUS2 is a next generation rompler of the highest quality that can turn your musical dreams into a stunning reality. Forget about stereotypical, boring, stale, old sounding ROM synths and embrace the power of NEXUS2 to evolve your productions to a new level of greatness. You can find here a lot of expansions and presets for NEXUS.

NEXUS2 explores new sonic territory delivering complex, ultra-fat, contemporary soundstorms that sound as good as the most expensive and best hardware available today. A powerful and flexible architecture is the foundation that supports the immediately useful and spontaneously engaging design of the instrument. Every aspect of NEXUS2 was built to produce music of the highest quality, quickly, with the least amount of fuss.

NEXUS2 features a world-class 32 step arpeggiator with note-transposition, an agile and simple 32 step trance gate, industry leading reverb licensed from Arts Acoustic, and a sophisticated modulation-matrix that will help you sculpt the sound.

Im going to say right from the off that Refx Nexus has revolutionised the way i work with music. The user interface is very pleasing to the eye due to the various skins that can be purchased, although when you purchase Nexus 2 you get 4 free skins and the Dance Volume 2 expansion which is great. Navigation within Nexus 2 is made easy with a single mouse click to access the various features within. There is nothing to confuse the user as within a couple of hours of using Nexus 2 you'll soon be very familiar with the instrument.

The sound of Nexus 2 is non other than brilliant, the quality rivals many top hardware synths without a shadow of a doubt and possibly sounds better than most. Added in version 2 are the excellent e.q facility which are:

new EQ types: lowpass, highpass, bandpass, bandpass2, notch, peak, lowShelf, highShelf, Q factor for each band free frequency (20-18000hz) for each band separate gain (-/+24db) for each band on/off switch for each band.

these features alone make Nexus 2 a winner.

Nexus 2 comes with a ton of new features and i in particular love the way i can mute different layers within any given multi-sample preset, you can transpose and detune any given oscillator which then brings endless possibilities to new sounds being created. You can also create an empty bank and save and rename those edited presets to your own banks. The arpeggiator is totally user programmable and there is a great arpeggio library included. My favourite feature is the shuffle feature within the arp page as i regularly use the 66% shuffle option which adds great value to the way i work. Nexus 2 now has 2 MultiFx and the new Phaser has 16 stages and sounds truly amazing. I could go on but you have to try Nexus 2 to really find out what it can do.

Documentation is well explained. (Enough said)

I myself own about 10 of the available 20 expansions and plan to purchase the Dance Volume 3 expansion in the week however again all expansions are of the best quality and developed by the best sound designers around and all credit is due to Refx for the sheer quality of sounds provided. Everything is there from Electro to trance and from the down right gritty industrial to the chilled out spacey stratosphere expansion. There is something for everyone here and scope to then edit and re arrange those sounds into something totally different.

The Refx customer support is one of the great things about owning Nexus as they are on hand every day on the forums answering user problems and you can also submit tickets for any other support. I like the fact that the people who designed not only Nexus but even the sound designers are there to offer advice so for that reason support is 10/10.

Value For Money:

For what you get with Nexus version 2 i think the price is second to none and when you buy various expansions whether it be 1 or more you instantly get a 15% discount when you go to checkout so for me this is really good value for money.

There are only 2 occasions where Nexus 2 has crashed for me using 2 presets, however this is expected in a new product and as always will be rectified with later updates and does not cause much for concern. I cannot deduct a point for this reason as it is very new and the problem only lies with the muting and unmuting of a certain preset. Other than that i can run easily 10 instances of Nexus on my machine not that i need that many. All in all the stability for me makes Nexus 2 a winner.

If you don't own Nexus 2 then Get it! It's already improved my workflow to no end and is probably my favourite piece of gear now that it's at version 2 and the fact that Nexus now uses a copy protection dongle which holds your licence makes it more attractive and it's also a very welcome addition to an already great piece of kit. I for one would recommend Refx Nexus 2 to anyone making electronic music as from the start it oozes creativity with fantastic results and i hope this review has been helpful cheer Rob Lee.

Bigtone Signature 2 - Glistening keys; complex, evolving soundscapes; muscular basses, and so much more.

Bigtone Signature 3 - Breath-taking pads – soft, silky, teeming with life. You have never heard such beautiful pad-sounds before.

Dance Vol 3 - another 135 presets from Manuel Schleis's bag of tricks-captivating leads, booty-shaking basses, glistening keys, heavenly pads, and fully tweakable tonal kicks. It just doesn't get better.

HandsUp Electro Bass - 150 of those bass sounds that send people racing for that last remaining piece of dance floor real estate. Manuel Schleis delivers again.

HandsUp Electro Bass Vol 2 - Put 'em up for the undisputed champion of the low end. HandsUp Electro Bass 2 serves up another helping of Manuel Schleis's dancefloor-destroying basses, covering electro, progressive, and trance.

Pop - Imagine a band that always shows up on time, hits all the notes, sounds fantastic, and never talks back. that's Pop: an expansion of 128 organs, winds, pianos, strings, drums, choirs, and basses that allows you to focus on the music and leave the headaches to someone else.
