Learn more Photo Michael Hession Electronics Computers The Best Windows Ultrabook Updated September 3, 2020 We've updated the What to look forward to section with details on Intel's upcoming eleventh-generation processors. Your guide Kimber Streams Share this review Many ultrabooks are good—by definition, they're powerful thin and light laptops with long battery life—but only a few stand out as great. After testing 12 new models in early 2020 and testing hundreds of laptops in the past six years, we found that the Dell XPS 13 9300 is the best Windows ultrabook for most people. Different versions of the XPS 13 have been our top pick since early 2015, and this new redesign is the best one yet.

Our pick Dell XPS 13 9300 The best ultrabook The Dell XPS 13 is thin and light, and it has long battery life, a great keyboard, a reliable trackpad, and a spacious screen. Intel Core i5-1035G1 It also offers fast performance and a spacious screen with a taller aspect ratio ideal for Web browsing and document work. Advertisement Also great HP Spectre x360 13 The best convertible laptop The HP Spectre x360 13 has a stylus and a touchscreen and can flip into tablet mode, but it's heavier than our top pick. While our preferred configuration is unavailable, we recommend the Core i7-1065G7 model linked here. Intel Core i5-1035G4 If you want a laptop with a stylus and a 360-degree hinge that lets you flip the screen all the way around to use the system as a tablet or in any intermediate position, such as tent mode and you don't mind carrying something a little heavier than our top pick, get the HP Spectre x360 13. It's similar in size to the XPS 13, and it offers solid battery life, comparable performance, a reliable keyboard and trackpad, and a vibrant touchscreen. Budget pick Lenovo Yoga C740 14 The best value The Yoga C740 is the best laptop you can get for the price. It offers performance similar to that of our top pick, but it's larger and heavier, and it has shorter battery life. Intel Core i5-10210U But it's powerful and portable enough to use for a full day of work or classes. And unlike most cheap ultrabooks, the C740 is sturdy, has a fingerprint reader, and comes with a USB-C charger. Upgrade pick Lenovo ThinkPad X1 Carbon Gen 7 A businesslike ultrabook The Lenovo ThinkPad X1 Carbon is extremely light, and it has our favorite laptop keyboard and more ports than our top pick. But it costs more than you need to pay to get something great. Intel Core i5-10210U Battery life may differ with the newer processor, but we expect it to be in the same ballpark.
